1. Preface

1.1 Document Purpose

The purpose of this document is to provide a detailed and complete specification of Government Services for the Faculty of Engineering, Helwan University.

The document will provide an overview of the system in the first section; then each part will be explained in detail in the second and third sections.

1.2 Target Users

This document is composed by system engineers based on the requirements gathered from Egyptian People.

This document is intended to be approved by the Dean and the Vice Dean for Education and Student Affairs of the Faculty of Engineering, Helwan University and the staff working on developing the system.

1.3 Revision History

Version	Description	Date
0.1	Initial	22-10-2023
0.2		10-12-2023
0.3		26-12-2023

2. Introduction

2.1 Purpose

This application aims to Facilitating life for citizens and making them more comfortable by making government services available online, as citizens do not need to go to government services and stand in large queues, which leads to a waste of time and the spread of diseases so we solve these problems. We are now providing effective services to satisfy the citizen and his comfort. These services are:

1. traffic service system.
2. Ration Card System.
3. Record civilian System.
4. Health System.
5. Education System.

2.2 Scope

Government Services is a software for managing citizens data. It basically automates the work Government Services. The software will be a part of a bigger system that will manage citizens Government Services.

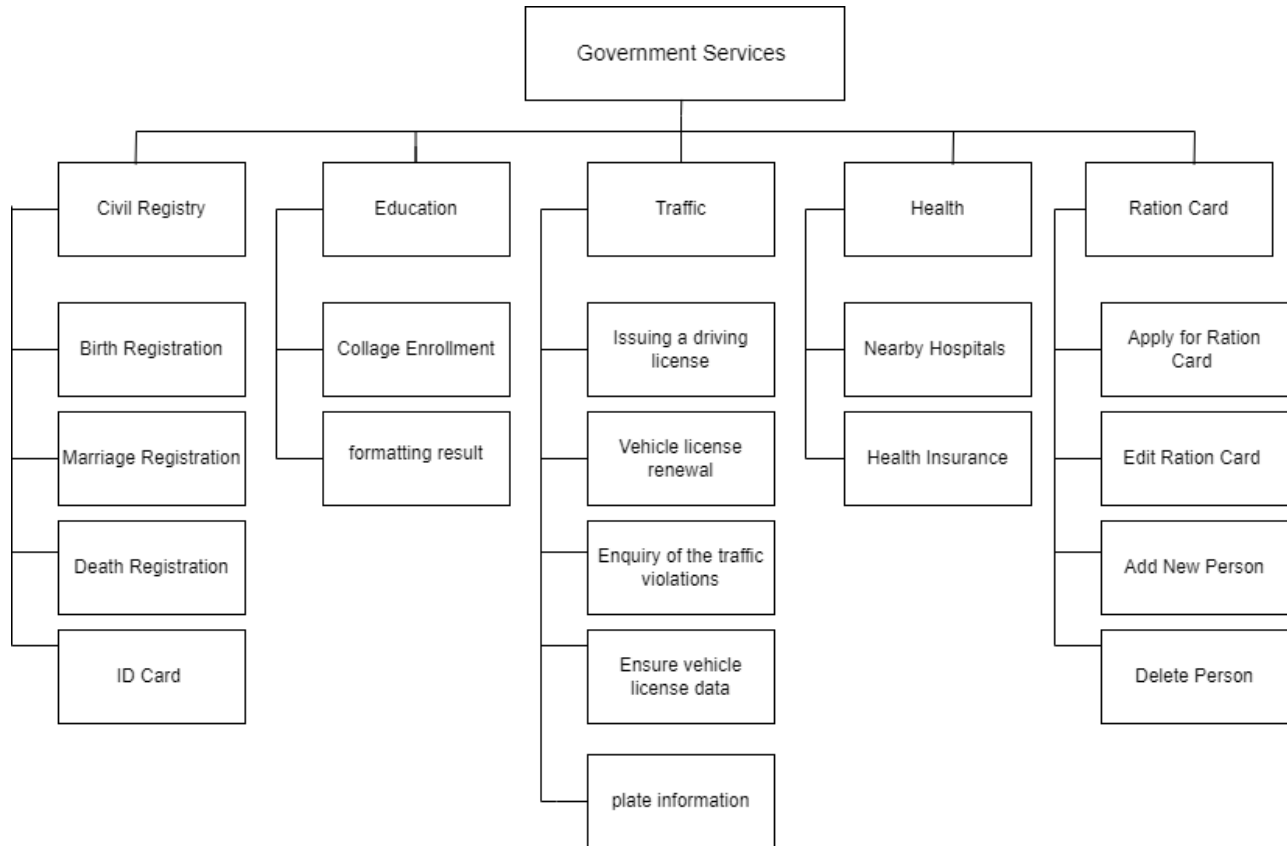

Figure 1:-System Functions hierarchy

2.3 Overview

The Government Services Portal Project is an ambitious and transformative initiative aimed at modernizing the delivery of essential government services to citizens. This project envisions the development of Desktop Application, simplify, and enhance the accessibility of a wide range of government services, including civil registry, education, traffic, health, and ration card services.

3. Glossary

3.1 Acronyms, definitions, and abbreviations.

- SRS: Software Requirements Specification
- UI: User Interface

4. System Users

4.1 System stakeholders

1. System Engineer

- 1.1. Responsible for requirements gathering
- 1.2. Responsible for development
- 1.3. Responsible for deployment and support

2. Government Agencies:

- Government agencies at the national, state, and local levels are primary stakeholders. They are responsible for delivering government services and will use the portal to streamline service delivery and interact with citizens and businesses.

3. Citizens:

- Citizens are the ultimate beneficiaries of the project. They represent a diverse group of individuals who seek access to government services, including birth registrations, marriage certificates, driver's licenses, healthcare appointments, and more.

4. Government Administrators:

- Government administrators, including civil registry officers, education department officials, traffic police, and health department personnel, are key stakeholders. They will manage the services provided through the portal and interact with users.

6. Software and Technology Partners:

- Software and technology partners providing the underlying infrastructure, security solutions, and cloud services are stakeholders. They are instrumental in the technical implementation of the project.

4.2 Users' objectives

1. System Engineer

- Gain Experience in software engineering and development

2. Government Agencies:

- reducing administrative overhead, paperwork, and the need for physical infrastructure, ultimately leading to cost savings.

3. Citizens:

- Citizens enjoy easy and convenient access to government services, reducing the time and effort required for service requests.
- The platform empowers citizens to independently manage their information and access government services.

4. Government Administrators:

- Government administrators can manage services more efficiently and respond to user requests promptly.
- Access to digital records simplifies data management and retrieval.

6. Software and Technology Partners:

- Opportunities for Collaboration: Software and technology partners have opportunities to provide essential infrastructure, security solutions, and technology services for a high-profile government project.

7. Administrator:

- Ensure Citizens data security

5. User Requirements definitions

5.1 System Functions

1. Birth Registration
2. Marriage Registration
3. Death certificate
4. Collage Enrollment
5. See formatting result
6. Issuing a new vehicle license
7. Ensure and view the vehicle license data
8. Updating the entered license data
9. Show the plates of the vehicle by entering driver id
10. Show the violation by entering the id
11. Show Nearby Hospitals
12. Get Health Insurance
13. Apply for Ration Card
14. Edit Ration Card
15. Add New Person
16. Delete Person

5.2 Constraints

- Entered Id should be unique and exist.
- Entered Id card should be unique and exist.
- Id is unique and not repeated
- Plate id is unique and not repeated
- Marriage number is unique and not repeated

6. System Architecture

Figure 2 :System Architecture

7. System Functional requirements

7.1 Civil Registry

7.1.1 Register Birth Registration

Citizens shall be able to register the birth of a child online.

Users must provide the child's name, date of birth, place of birth, and parents' information.

The system should assign a unique registration number.

7.1.2 Register Marriage Registration

Users shall be able to submit marriage registration requests.

Required details include the IDs of the spouses, date of marriage.

7.1.3 Register Death Registration

Users can report a death and request a death certificate.

The system shall collect information on the deceased person, including ID, date of death.

7.2 Education

7.2.1 apply to collage

Parents or guardians can enroll their children in government collage.

The system shall collect student information, including name, ID, Sitting number, High School Name, Desires.

7.2.2 view result of applying

Students can See the collage whoever accepts it.

Users must provide their ID.

7.3 Traffic

7.3.1 Issuing a new vehicle license

Citizen can apply for a new vehicle license online by entre (ID, Name, phone number 1 , phone number 2,Address, slight_rate, diseases) to the system for making a new vehicle license.

7.3.2 Ensure the vehicle license data

The citizen can view and ensure the entered data to the system by entering his id.

7.3.3Updating the entered license data

Citizen can update information in his vehicle license online by entre (ID, phone number 1 , phone number 2, slight_rate) and this give him the opportunity to change the data that he wants to change

7.3.4 Show the plates of the vehicle

The citizen can view his plate number and letters by entering his id

7.3.5 Show the violation

The citizen can view his violations by entering the id and make him know his car violations

7.4 Health

7.4.1 Show Nearby Hospitals

Citizens can see hospitals around him.

7.4.2 register Health Insurance

Citizens can obtain health insurance.

7.5 Ration Card

7.5.1 Apply for Ration Card

Citizens can apply for a ration card to access subsidized food items.

Users must provide ID, name, phone number, city, region, street, status birthday date.

7.5.2 Edit Ration Card

Enable citizen to Edit on his Created card (change phone, address, any information expect id, id_card).

7.5.3 Add New Person

Enable citizen to Add new Person to it's Card by add his name and enter it's private id_card number.

7.5.4 Delete Person

Enable citizen to Delete Person from Card by entering the name he wants to delete it and id_card which this person on it.

8. Interface requirements

8.1 User interfaces:

Figure 3 : Main Page

Figure 4 :Ration Card

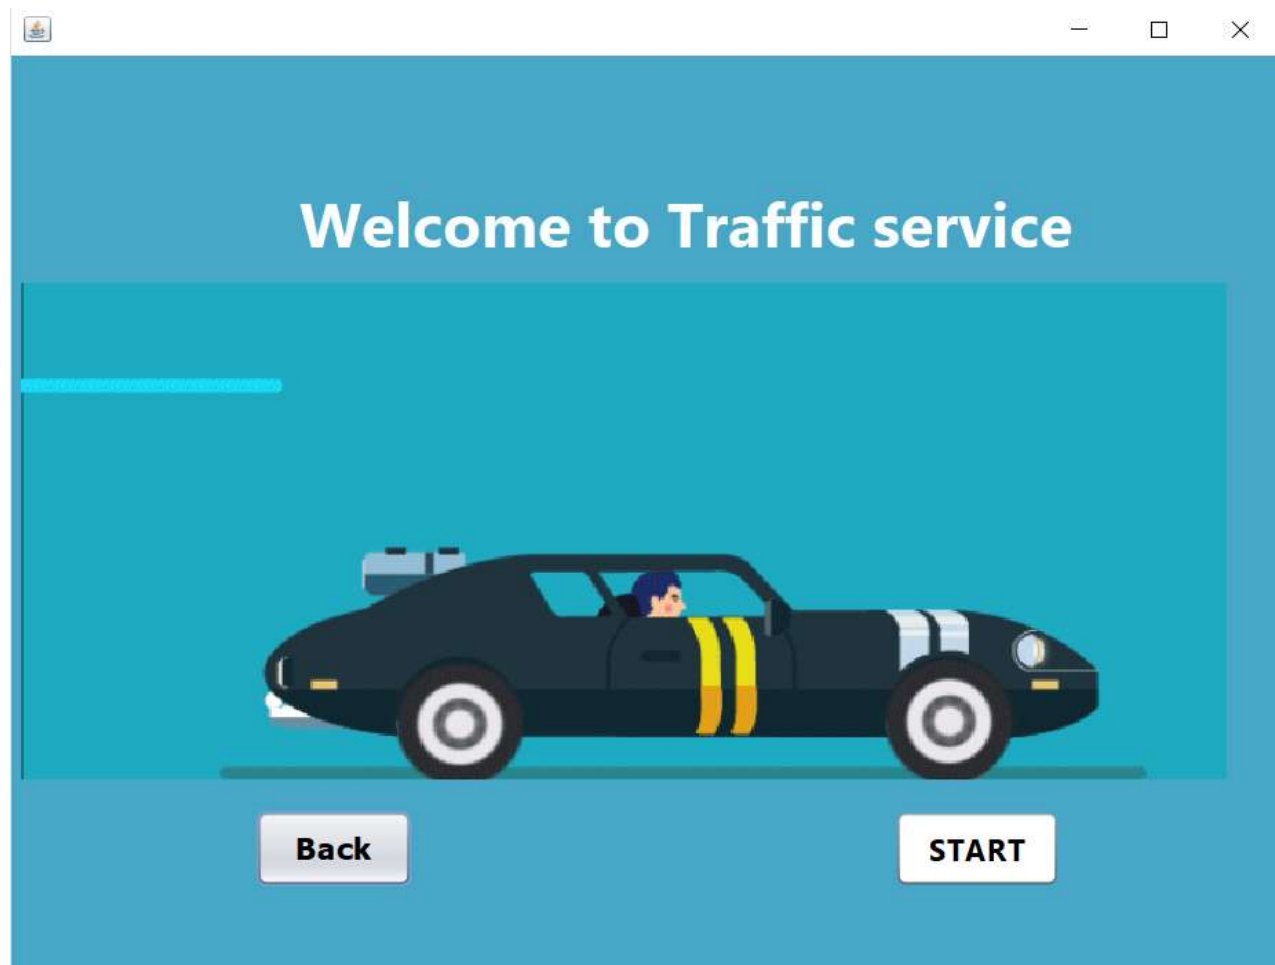

Figure 5 start traffic

Figure 6 : Traffic

Figure 7 :Record Civilian

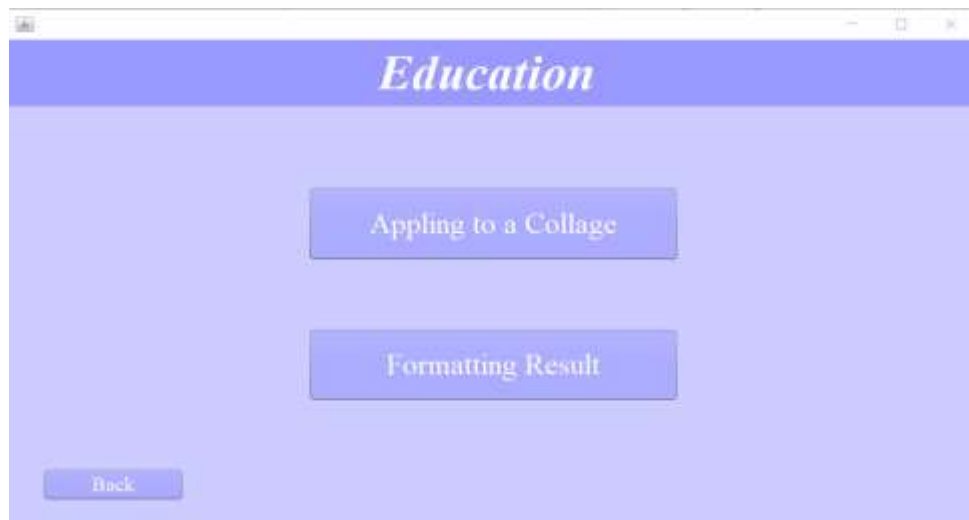

Figure 8:Education

Figure 9 :Health

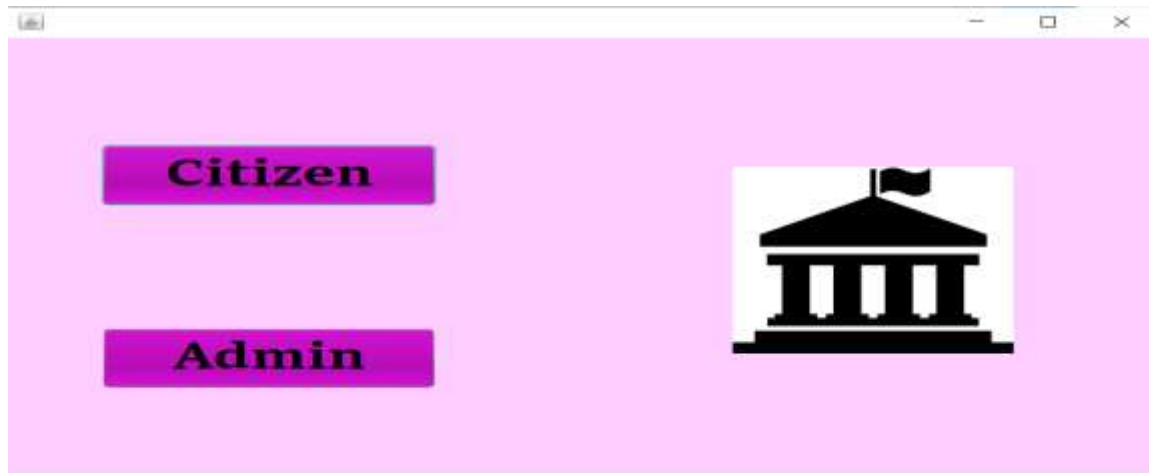

Figure 9: Identifier

Figure 10: Admin

The screenshot shows a web application window titled "Death_Certificate". The window has a dark gray header bar with the title. Below the header, the form has a light gray background. It contains two input fields: "ID" and "Death_Date". The "ID" field is a text box with a blue border, and the "Death_Date" field is a text box with a white border. At the bottom of the form, there are two buttons: "Back" and "Insert".

Death_Certificate	
ID	<input type="text"/>
Death_Date	<input type="text"/>
<input type="button" value="Back"/>	<input type="button" value="Insert"/>

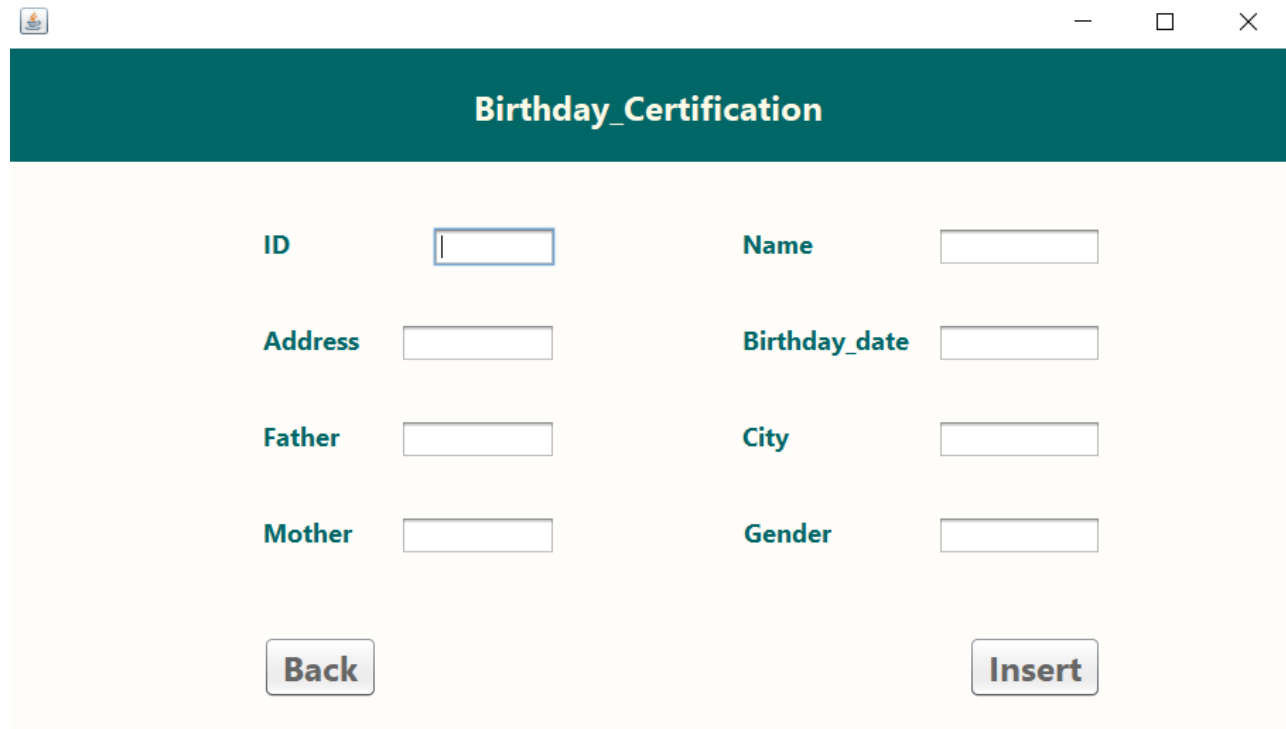

Figure 11: Death_Certificate

The screenshot shows a web application window titled "Id_Card". The window has a dark blue header bar with the title. Below the header, the form has a light blue background. It contains six input fields: "Name", "Job", "Address", "City", "Material_Status", and "Gender". The "Name" field is a text box with a blue border, and the other five fields are text boxes with white borders. At the bottom of the form, there are two buttons: "Back" and "Insert".

Id_Card			
Name	<input type="text"/>	Job	<input type="text"/>
Address	<input type="text"/>	City	<input type="text"/>
Material_Status	<input type="text"/>	Gender	<input type="text"/>
<input type="button" value="Back"/>		<input type="button" value="Insert"/>	

Figure 12: ID_Card

The screenshot shows a web application window titled "Birthday_Certification". The window has a dark green header bar with the title in white. Below the header, the form is set against a light yellow background. It contains eight input fields arranged in two columns. The left column has fields for "ID", "Address", "Father", and "Mother". The right column has fields for "Name", "Birthday_date", "City", and "Gender". At the bottom of the form, there are two buttons: "Back" on the left and "Insert" on the right. The window includes standard OS controls (minimize, maximize, close) in the top right corner.

ID	<input type="text"/>	Name	<input type="text"/>
Address	<input type="text"/>	Birthday_date	<input type="text"/>
Father	<input type="text"/>	City	<input type="text"/>
Mother	<input type="text"/>	Gender	<input type="text"/>

Figure 13: Birthday_Certification

The screenshot shows a web application window titled "Marriage Contract". The window has a yellow header bar with the title in black. Below the header, the form is set against a light yellow background. It contains three input fields on the left: "Husband ID", "Wife ID", and "Marriage Date". On the right side, there is a circular icon depicting a man and a woman in wedding attire. At the bottom of the form, there are two buttons: "Back" on the left and "Done" on the right. The window includes standard OS controls (minimize, maximize, close) in the top right corner.

Husband ID	<input type="text"/>	
Wife ID	<input type="text"/>	
Marriage Date	<input type="text"/>	

Figure 14: Marriage Contract

The screenshot shows a web browser window with a title bar containing a small icon and standard minimize, maximize, and close buttons. The main content area has a dark green header with the text "CreatNew Ration Card" in white. Below the header, the form is organized into two columns. The left column contains labels "ID Number", "Phone", "Region", and "Status" next to their respective input fields. The right column contains labels "Name", "city", "Street", and "Birthday_date" next to their respective input fields. Below these input fields is a table with 10 columns: "ID_C...", "Name", "Phone", "City", "Regl...", "Street", "Status", "Birth...", and "ID". The table has one empty row below the header. At the bottom of the form, there are three buttons: "Back", "Show Data", and "Submit".

ID_C...	Name	Phone	City	Regl...	Street	Status	Birth...	ID

Figure 14: Create New Ration Card

The screenshot shows a web browser window with a title bar containing a small icon and standard minimize, maximize, and close buttons. The main content area has a dark green header with the text "Edit in Card Ration" in white. Below the header, the form is organized into two columns. The left column contains labels "Enter Id_Card", "Enter Name", and "Region" next to their respective input fields. The right column contains labels "Edit City", "Edit Street", "Edit Phone", and "Edit Status" next to their respective input fields. At the bottom of the form, there are two buttons: "Back" and "Edit".

Figure 15: Edit in Ration Card

The screenshot shows a web browser window with a title bar. The page has a dark green header with the text "Add New Person" in white. Below the header, there are three input fields with labels: "ID", "Enter ID of Card Ration", and "Name of New Person". Below these fields is a table with three columns: "Name", "Id_card", and "Id". The table has two empty rows. At the bottom of the form, there are three buttons: "Back", "Show", and "Add".

Name	Id_card	Id

Figure 16: Add Person to Ration card

The screenshot shows a web browser window with a title bar. The page has a dark green header with the text "Delete Person From Card Ration" in white. Below the header, there are three input fields with labels: "Enter Id", "Enter id_card", and "Enter Name of person you want to delete it". At the bottom of the form, there are two buttons: "Back" and "Delete".

Figure 17: Delete person from ration card

The screenshot shows a web application window titled "Applying to collage". On the left is a blue sidebar with the word "Education" at the top. Below it are three buttons: "Applying to collage", "formatting result", and "Back". The main area has a light blue background and the title "Applying to collage". Below the title is the text "what collage do you want?". There are five input fields: "Name" (with a "First" label to its right), "ID", "Sitting number", "High school Name", and "High School grade". An "Apply" button is located at the bottom right of the main area.

Figure 18: Applying to collage

The screenshot shows a web application window titled "Formatting Result". On the left is a blue sidebar with the word "Education" at the top. Below it are three buttons: "Applying to collage", "formatting result", and "Back". The main area has a light blue background and the title "Formatting Result". Below the title are two input fields labeled "ID" and "Sitting Number". A "Search" button is located at the bottom right of the main area.

Figure 19: Formatting Result

The screenshot shows a web application window titled "Nearby Hospitals". On the left is a blue sidebar with the word "Health" at the top. Below it are two buttons: "Nearby Hospitals" (which is highlighted) and "Health Insurance". At the bottom of the sidebar is a "Back" button. The main content area has a light blue background and the title "Nearby Hospitals". It contains an "ID" label followed by a text input field with the number "1". To the right of the input field is a "Search" button. Below the "ID" field is a label "Hospitals" followed by a text area containing the text "ainshames", "tiba", and "Alamal" on separate lines.

Figure 20: Nearby Hospitals

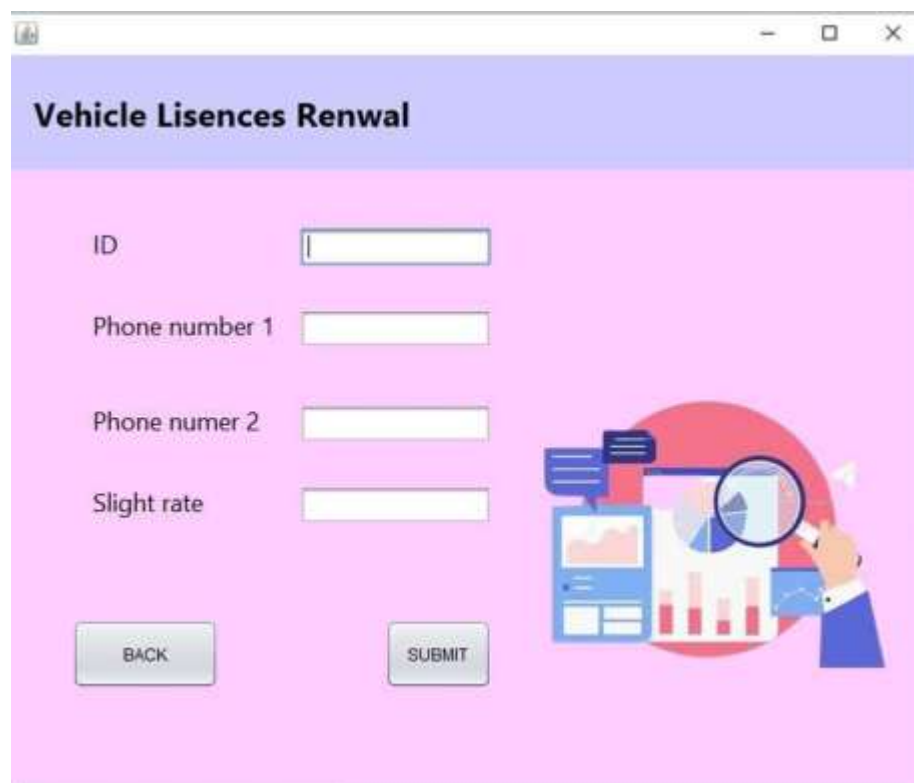

The screenshot shows a web application window titled "Health Insurance". On the left is a blue sidebar with the word "Health" at the top. Below it are two buttons: "Nearby Hospitals" and "Health Insurance" (which is highlighted). At the bottom of the sidebar is a "Back" button. The main content area has a light blue background and the title "Health Insurance". It contains a "Note : That is include Two Children" at the top. Below the note are three labels with corresponding text input fields: "Marriage Number", "First Child ID", and "Second Child ID". At the bottom right of the main area is an "Apply" button.

Figure 21: Health Insurance

The screenshot shows a web application window with a pink header bar containing the title "Issuing a driving license". The main content area has a light blue background. It contains several input fields: "ID", "Name", "phone number 1", "phone number 2", "Address", and "sight rate". Below these fields is a question "Do you suffer from chronic diseases?" with two radio button options: "YES" and "NO". At the bottom left is a "BACK" button, and at the bottom right is a "Submit" button.

Figure 22: Issuing a driving license

The screenshot shows a web application window with a light blue header bar containing the title "Vehicle Lisences Renwal". The main content area has a pink background. It contains four input fields: "ID", "Phone number 1", "Phone numner: 2" (note the typo), and "Slight rate" (note the typo). Below these fields are "BACK" and "SUBMIT" buttons. On the right side of the form, there is a colorful illustration of a person in a suit holding a magnifying glass over a dashboard with various charts and graphs.

Figure 23: Vehicle Lisences Renwal

A screenshot of a web application window titled "Traffic Violations". The window has a yellow header bar with the title in bold black text. Below the header, the background is light blue. On the left, the text "Enter your ID to know your Violations" is displayed in bold black font. Below this text is a large white rectangular input field. To the right of the input field is a cartoon illustration of a police officer in a yellow high-visibility vest and blue uniform, holding a smartphone. Below the input field are two buttons: a "SUBMIT" button and a "BACK" button, both with a light gray gradient and rounded corners.

8.2 Software Interfaces

- Database using SQL server management using connection string
- The connection string is used to connect from the java application to the specified database server. We need database hostname, database name, database username, database user password, and database port number to connect the database server using the connection string.

8.3 Communications Interfaces

- Application-Database communication will be through Local Host Communication on port 1433

9. Non-functional requirements

9.1 Availability:

The system should be available during working hours.

9.2 Security:

No one can access the whole data base.

9.3 Data Accuracy:

Accurate and reliable data management benefits businesses that rely on government records.

9.4 Usability:

Citizens enjoy easy and convenient access to government services, reducing the time and effort required for service requests.

11. System Evolution

- The system should be able to work on different operating systems.
- It should work properly on devices with low specifications. Only the server on which it's installed will be powerful.
- The outline of the generated certificates and reports may be subjected to changes.
